

Problem 1: Accept 5 values and print them later on.

Code:

```
#include <stdio.h>
int main() {
    int arr[5], i;
    printf("Enter 5 values: ");
    for(i = 0; i < 5; i++) scanf("%d", &arr[i]);
    printf("The values are: ");
    for(i = 0; i < 5; i++) printf("%d ", arr[i]);
    return 0;
}
```

Output:

Enter 5 values: 1 2 7 8 9

The values are: 1 2 7 8 9
