

Problem 26: Reverse a string.

Code:

```
#include <stdio.h>
#include <string.h>

int main() {
    char str[100];
    int i;

    printf("Enter string: ");
    fgets(str, sizeof(str), stdin);
    str[strcspn(str, "\n")] = '\0'; // remove
    newline

    for(i = strlen(str) - 1; i >= 0; i--)
        printf("%c", str[i]);
    printf("\n");

    return 0;
}
```

Output:

Enter string: hello world
dlrow olleh
