Problem 24: Copy one string to another.

Code:

```c
#include <stdio.h>
#include <string.h>

int main() {
    char s1[100], s2[100];

    printf("Enter string: ");
    fgets(s1, sizeof(s1), stdin);
    s1[strcspn(s1, "\n")] = '\0';

    strcpy(s2, s1);

    printf("Copied: %s\n", s2);

    return 0;
}
```

Output:

Enter string: hello world
Copied: hello world
